

# SolarEdge Home EV Charger

## Drive on sunshine

Charge Your EV with Solar Energy and  
Maximise Your Savings

### Clean, convenient and cost-effective

Charging an EV typically requires a lot of power, which can seriously impact your energy bill. When you power your car with the clean solar energy produced by your SolarEdge PV system, you reduce your monthly electricity costs, protect yourself from rising energy rates and get more from your solar investment.

SolarEdge Home EV Charger is integrated into the SolarEdge Home energy ecosystem, so in addition to saving you money, it helps you achieve the optimal load balance in your home. Track and adjust your SolarEdge Home energy program in real time using the mySolarEdge app.

The SolarEdge Home EV Charger suits all EV types.

# Energy independence with solar-powered EV charging

The SolarEdge Home EV Charger is easy to use and provides a green solution to an energy guzzling device, so you save big.

---

## Charge smart at home

Your more sustainable lifestyle starts today. Have your EV charger installed in your garage or driveway to avoid waiting in line and external rates. Using your mySolarEdge app you can remotely activate charging, schedule grid charging at lowest rates, and balance your home energy loads.

---

## Connect to the ecosystem

Integrate an EV Charger into your SolarEdge Home ecosystem to benefit from smart energy management, scheduled charging and free solar power for your car. If you would like to add an additional charger, it can still be remotely managed by the mySolarEdge app.

---

## Access charging history

Use the mySolarEdge app to generate and send charging reports for reimbursement by your employer. Charging records comply with the EU MID-metering standards required by some companies for reimbursing employees.

---

## Protect yourself

Grid outage? No problem - if you have the SolarEdge Home backup suite (SolarEdge Home Hub Inverter, SolarEdge Home Backup Interface, and SolarEdge Home Battery). Define your EV Charger as an essential device and charge even when the grid is down. And your SolarEdge Home EV Charger is backed by a 3-year warranty from SolarEdge – we've got you covered.

SolarEdge Home is a smart energy ecosystem that enables homeowners to control and optimise their energy production, consumption and storage with a single app. SolarEdge Home manages the home's solar and grid power 24/7 to minimise electricity costs and maximise savings. In addition to SolarEdge Power Optimizers, inverters and batteries, SolarEdge Home includes a full suite of smart energy devices so homeowners can grow their ecosystem to match their evolving energy needs for true energy independence.
